PHOTOVOLTAICS, RENEWABLE ENERGIES AND GREEN TECHNOLOGIES FOR SOUTHERN EUROPE AND THE MEDITERRANEAN COUNTRIES

PRESS RELEASE

MEETINGS, BUSINESS, AND UPDATES AT ZEROEMISSION MEDITERRANEAN 2024

Great success for the latest edition of the event dedicated to renewable energy, sustainable mobility, and green technologies, held from October 16 to 18 at Fiera Roma

Rome, October 21, 2024 – The 2024 edition of **ZEROEMISSION MEDITERRANEAN**, the international trade fair dedicated to **renewables, energy efficiency, electric mobility, and green technologies**, concluded successfully. Over three days, from **October 16 to 18, Roma Exhibition Centre** reaffirmed the importance of the event as a key reference point for all professionals in the green sector.

ZEROEMISSION MEDITERRANEAN 2024 consolidated the positive trend seen in recent years, attracting participants from various countries and reinforcing the international nature of the event. The exhibition hosted key figures from the **energy and green technology sectors**, with a broad participation of innovative companies, startups, research centers, and market leaders. Companies, professionals, operators, and researchers working in the fields of renewable energy and green technologies gathered at **ZEROEMISSION MEDITERRANEAN 2024** to discuss the market, industry, and future perspectives, transforming the exhibition spaces and conference halls at Roma Exhibition Centre into opportunities for meetings, business, and updates. The B2B format of the event was highly appreciated, offering more than 21 conferences, seminars, round tables, and workshops with the participation of internationally renowned experts. The spotlight was on all the most relevant topics for the sector, including photovoltaics, sustainable mobility, household electrification, innovation, and the digitalization of energy networks.

Among the most appreciated innovations was the **Air Mobility Show**, which hosted the tenth edition of the **Rome Drone Conference**. Exhibitors such as **Pipistrel, D-Flight, and FlyingBasket**, with its "FB3" multirotor cargo drone (capable of flying with 100 kg of cargo), drew attention to innovative solutions for electric aviation, vertical take-off aircraft (eVTOL), and Unmanned Aerial Systems (UAS). The simultaneous presence of the **Blue Planet Economy Expoforum** further enriched the event with topics related to the green and blue economy, including the sustainable management of marine resources, ocean protection, and green logistics.

Organized by **A151 Srl**, in collaboration with Roma Exhibition Centre and with the support of Roma Capitale and **MASE** (Ministry of Environment and Energy Security), the event confirmed its role as a strategic platform for promoting the energy transition and sustainable technologies. The success of **ZEROEMISSION MEDITERRANEAN 2024** lays a solid foundation for the launch of the next
